PART I	Introducing Psychology	1
Chapter 1	What Is Psychology?	3
	What Is Psychology?	4
	Why Do Psychologists Do What They Do?	7
	How Do Psychologists Conduct Research?	11
	Tests and Surveys	11
	Case Studies	11
	Naturalistic Observation	12
	Experiments	13
	How Do Psychologists Determine Cause and Effect?	16
	Controlled Experimental Designs	16
	Correlational Designs	20
	What Ethical Issues Do Psychologists Face?	22
	How Did Psychology Emerge as a Science?	24
	Early Roots of Psychology	25
	Emergence of Psychology: Diverse Perspectives	27
	What Are the Main 20th-Century Perspectives on Psychology?	28
Chapter 2	Biological Psychology	35
	What Is Our Biological History?	36
	Evolutionary Theory	36
	Genetics	37
	How Is the Nervous System Organized?	40
	The Central Nervous System	40
	The Peripheral Nervous System	44
	What Are the Major Structures and Functions of the Human Brain?	45
	Viewing the Brain	45
	Structures and Functions of the Brain	47
	The Cerebral Hemispheres and the Cerebral Cortex	49
	How Is Information Processed in the Nervous System?	55
	Neurons	55
	Conduction of Information Within Neurons	58
	Communication Between Neurons	60
	How Does the Endocrine System Work?	62
Chapter 3	Development	69
	What Developmental Trends Have Psychologists Observed?	71
	What Are the Roles of Maturation and Learning?	71
	The Nature–Nurture Controversy: Maturation Versus Learning	71

The Roles of Maturation and Learning: The	
Developmental Theories of Piaget and Vygotsky	72
What Happens During Prenatal Development?	74
How Do Infants and Young Toddlers Develop?	76
What Can Newborns Do?	76
Physical Development During Infancy	77
Cognitive Development in Infancy	77
Socioemotional Development During Infancy	78
How Do Children Develop?	82
Cognitive Development During Childhood	82
Socioemotional Development	86
What Develops During Puberty and Adolescence?	90
Physical Development During Adolescence	90
Cognitive Development During Adolescence	90
Socioemotional Development	91
How Do Adults Develop and Age?	95

PART II Cognitive Processes 101

Chapter 4 Sensation and Perception	103
How Do Psychologists Study the Senses?	104
Detection	105
Discrimination: The Just-Noticeable Difference	106
What Are Some Biological Properties Common	
to All Senses?	106
Receptor Cells and Transduction	106
Sensory Coding	107
Detection of Changes in Stimuli	107
How Do We See?	108
The Nature of Light	108
Anatomy of the Eye	108
How We See	109
Color	109
How Do We Hear?	112
The Nature of Sound	112
How We Hear	113
Locating Sounds	114
How Do We Sense Taste, Smell, Touch,	
Movement, and Other Sensations?	116
Taste	116
Smell	118
Skin Senses	120
Body Senses	120
How Do We Make Sense of What We Sense?	121
How Do We Perceive What We See?	123
Space Perception	123
Form Perception	124
Perceptual Constancies	128

Chapter 5	Consciousness	135
	How Does Attention Work?	137
	What Levels of Consciousness Do We Experience? ..	139
	The Preconscious Level	139
	The Subconscious Level	141
	What Happens During Altered States of Consciousness?	142
	What Happens When We Sleep and Dream?	143
	Stages of Sleep	143
	Sleep Deprivation	144
	Circadian Rhythms	145
	Sleep Disorders	146
	Dreams	147
	Is Hypnosis an Altered State?	148
	The Phenomenon of Hypnosis: Real or Fake?	148
	Theories of Hypnosis	150
	What Happens When We Meditate?	151
	How Do Drugs Induce Alterations in Consciousness?	151
	Pattern of Drug Use	151
	Narcotics	153
	Central Nervous System Depressants	154
	Central Nervous System Stimulants	156
	Hallucinogenics	156
	Treatment of Drug Abuse	157
Chapter 6	Learning	163
	What Are Some Preprogrammed Responses?	164
	What Is Classical Conditioning?	166
	Pavlov's Discovery of Classical Conditioning	167
	The Basics of Classical Conditioning	168
	Why Does Classical Conditioning Occur?	169
	Phases and Features of Classical Conditioning	170
	Surprising Relationships Between the Stimulus and the Response	172
	What Is Operant Conditioning?	174
	Thorndike's Law of Effect	175
	Reinforcement	176
	Punishment	177
	How Is Operant Conditioning Implemented?	179
	Skinner and the Experimental Analysis of Behavior ..	182
	What Is Social Learning?	184
Chapter 7	Memory	191
	How Do Psychologists Study Memory?	192
	Case Studies of Memory Deficiencies: Amnesia	192
	Case Studies of Outstanding Memory: Mnemonists	193
	Experimental Study of Memory	193

How Have Psychologists Traditionally Viewed Memory?	197
Sensory Memory	198
Short-Term Memory	198
Long-Term Memory	199
What Are Some Alternative Ways to View Memory?	201
Alternative Views of Memory Processes	201
A Neuropsychological View of Memory	203
How Is Information Encoded, Stored, and Retrieved?	205
Encoding of Information	205
Storage and Forgetting	208
Retrieval	210
How Do We Construct Our Own Memory?	212

Chapter 8

Thought and Language	223
What Is Problem Solving?	225
Well-Structured Problems: Heuristics and Algorithms	225
Ill-Structured Problems: Insight	227
Hindrances to Problem Solving	228
Aids to Problem Solving	229
Expertise: Knowledge and Problem Solving	231
What Are Judgment and Decision Making?	232
Decision-Making Strategies	232
Heuristics and Biases of Judgment	234
What Is Reasoning?	236
Deductive Reasoning	237
Inductive Reasoning	237
What Is Language?	238
How Do We Acquire Language?	241
How Do We Understand and Arrange Words?	243
Semantics: The Study of Meaning	243
Syntax: The Study of Structure	243
How Do We Use Language in a Social Context?	245
Linguistic Relativity and Linguistic Universals	246
Bilingualism	247

Chapter 9

Intelligence and Creativity	253
What Are Two Traditional Approaches to Studying Intelligence?	254
How Do Psychologists Assess Intelligence?	256
Mental Age and the Intelligence Quotient	256
Deviation IQ Scores	256
The Stanford–Binet Intelligence Scales	257
The Wechsler Scales	257
Additional Tests Related to Intelligence Testing	259
Characteristics of Intelligence Tests	260

How Should We Try to Understand the Nature of Intelligence?	261
Structures and Processes of Intelligence	261
Context of Intelligence	262
Intelligence as a System	266
What Have We Learned About Extremes of Intelligence?	269
Intellectual Giftedness	269
Mental Retardation	270
Is Intelligence Inherited?	272
Can We Improve Intelligence?	273
What Is Creativity, and How Does It Emerge?	275

PART III Social Processes 281

Chapter 10 Social Psychology	283
What Is Social Cognition?	285
Cognitive-Consistency Theory	285
Attribution Theory	287
How Do We Form and Change Our Attitudes?	288
Why Are We Attracted to the People We Like or Love?	291
Theories of Liking and Interpersonal Attraction	291
Theories of Love	292
Attraction	292
How Do We Communicate in Our Personal Relationships?	294
What Happens When We Interact in Groups?	295
Social Facilitation and Social Interference	295
Social Loafing	296
Group Polarization	297
Groupthink	297
When and How Do We Conform, Comply, and Obey?	299
Conformity	299
Compliance	301
Obedience	301
What Leads Us to Show Prosocial Behavior?	304
What Leads Us to Show Antisocial Behavior?	307
Prejudice	307
Aggression	310
Chapter 11 Motivation and Emotion	317
How Did Early Psychologists Explain Motivation? ..	318
How Does Human Physiology Influence Human Motivation?	319
Homeostatic-Regulation Theory	319
Opponent-Process Theory	324
Arousal Theory	326

How Do Psychological and Other Needs Influence Motivation?	327
Murray's Theory of Needs.	327
McClelland's Need for Achievement	327
Maslow's Need Hierarchy	328
How Does Cognition Influence Motivation?	330
Intrinsic and Extrinsic Motivators	330
Curiosity, Self-determination, and Self-efficacy.	331
What Emotions Do People Feel?	335
How Do Psychologists Approach Trying to Understand Emotions?	338
Emotions in an Evolutionary Perspective.	338
Psychophysiological Approaches to Emotion.	339
Cognitive Approaches to Emotion	342
Cross-cultural Approaches to Emotion	344
How Do People Express Emotions?	346
Culture and Emotional Expression.	346
Social Functions of Emotional Expression	347
Chapter 12 Personality	351
How Do Psychodynamic Psychologists View Personality?	352
The Nature of Psychodynamic Theories	352
Psychoanalysis: The Theory of Sigmund Freud.	354
The Neo-Freudians	358
How Do Humanistic Psychologists View Personality?	362
How Do Cognitive–Behavioral Psychologists View Personality?	364
Early Behavioristic Approaches	364
The Social-Learning Theory of Julian Rotter	365
The Social-Cognitive Theory of Albert Bandura	366
How Do Trait Theorists View Personality?	367
Theories Based on Individual Variations of Universal Personality Traits	369
Theories Based on Individual Sets of Distinctive Personality Traits.	371
How Do Interactionist Psychologists View Personality?	372
How Do Psychologists Assess Personality?	374
Assessments Based on Psychodynamic Theories: Projective Personality Tests	374
Assessments Based on Trait Theories: Objective Tests	376
Evaluation of Personality Tests.	377
PART IV Clinical and Health Psychology	383
Chapter 13 Abnormal Psychology	385
What Is Abnormal Behavior?	386

How Have People Explained Abnormal Behavior? . . .	388
Demonological Explanations	388
Clinical Explanations	388
How Do Clinicians Diagnose Abnormal Behavior? . .	391
What Are Anxiety Disorders?	392
What Are Mood Disorders?	395
Depressive Disorders	395
Bipolar Disorders	396
What Are Dissociative Disorders?	398
What Is Schizophrenia?	399
Types of Schizophrenia	401
Demographic Issues in Schizophrenia	401
What Are Impulse-Control Disorders?	403
What Are Personality Disorders?	404
What Disorders Are Usually First Diagnosed in Infancy, Childhood, or Adolescence?	404
What Are Some Additional Psychological Disorders?	405
How Do Psychologists View Suicide?	406
What Legal Issues Do Clinicians Face?	409
Criminal Law	409
Civil Law	410
Chapter 14 Psychotherapy	415
What Were Some Early Methods of Psychotherapeutic Intervention?	416
How and Why Do Clinicians Diagnose Abnormal Behavior?	417
How Do Different Psychologists Approach Psychotherapy?	418
Psychodynamic Therapy	419
Humanistic Therapies	420
Behavior Therapies	422
Cognitive Approaches to Therapy	423
Biological Therapies	425
Multicultural Approaches to Psychotherapy	429
What Are Some Alternatives to Individual Psychotherapy?	431
Group Therapy	431
Couples and Family Therapy	431
Self-Help	433
Is There an Optimal Approach to Psychotherapy? . . .	435
How Effective Is Psychotherapy?	437
What Are Some Key Ethical Issues in Psychotherapy?	440
Chapter 15 Health Psychology	447
What Do Health Psychologists Study?	448
How Can People Enhance Their Health Through Lifestyle Choices?	450

Contents

How Do Personality and Stress Influence Health? . . .	452
Stressors	453
Stress Responses	457
Personality and Perceived Stress	459
How Do Personality Patterns Relate to Illness?	463
Type-A Versus Type-B Behavior Patterns	463
Hardiness and Stress Resistance	464
How Do Our Minds Experience Pain?	465
Kinds of Pain	466
Personality and Pain	467
How Do People Live with Serious, Chronic Health Problems?	468
AIDS: Incidence and Prevention	469
Psychological Models for Coping with Chronic Illness	470
Statistical Appendix	477
Descriptive Statistics	477
Measures of Central Tendency	478
Measures of Variability	480
The Normal Distribution	481
Types of Scores	481
Correlation and Regression	482
Inferential Statistics	484
Glossary	485
References	497
Acknowledgments	517
Photo Credits	519
Author Index	521
Subject Index	529
